

YellowScan CloudStation Viewer.

Visualizing point clouds has never been easier

Experience CloudStation Viewer's sleek and intuitive interface to import and display point cloud files of any size, together with your control points. Navigate in 3D and effortlessly analyze your data with tools to display and filter your points. Unlike YellowScan's full CloudStation software, the Viewer is free and dedicated to visualization only, making it the simplest way to explore your point clouds.

Main Features

- Intuitive graphical interface
- Easy import, no point limit
- Advanced visualization tools
- Access our dataset catalog from CloudStation Viewer

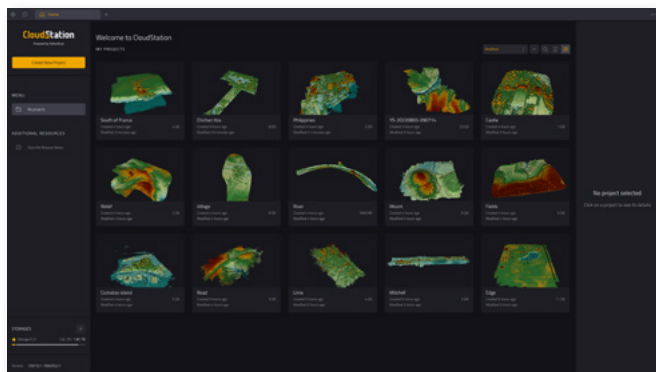

Technical Specifications

- Operates on Windows 10 & 11
- Automatic updates
- Free download

Software description.

CloudStation Viewer makes your projects easy to access and manage. Open multiple datasets side by side, explore them in 3D, and keep everything organized in the built-in Catalog. Whether you're checking raw data, reviewing control points, or sharing results, the Viewer is designed for quick, hassle-free visualization.

Create your Catalog.

The Catalog keeps all your projects organized and ready each time you start CloudStation Viewer. No project yet? Explore our dataset catalog directly from the Viewer!

Interact with Reality in 3D.

3D Navigation

Our custom proprietary viewer is tailored for performance at any point cloud size. Experience smooth, seamless navigation in your data.

Slices

Sometimes it's easier to slice your data. With CloudStation Viewer, you're just two clicks away from a new perspective on your canopy, road, or any area you want to explore.

Measuring Tool

Inspect your data, take precise measurements, and easily export them for reporting

Display & Filter

Choose what you want to see with our powerful yet simple to use visualization and filtering tools. Create mixes to display multiple information at once, filter based on values and make your data show what you need.

All your tools are here

No more searching for your tool in endless ribbons and dropdowns. Quickly access all your tools and understand your point cloud, now.
